Professional Experience

Full Stack Developer

Naxotop Pvt. Ltd

06/2021 – 08/2024

Mian Channu, Pakistan

- Started as a Web Development Intern and grew into a Full Stack Developer, working on complete SaaS products and client-based solutions.
- Developed and delivered end-to-end applications including "Stopmotion editor, daycare management systems, marketplaces, Formation Trader, web scraper's, and resume builder" SaaS applications.
- Designed scalable project architecture and established clean development structures for multiple projects from scratch.

Featured Projects

Custom Gang Sheet Web Editor

02/2026 – 04/2026

Website

- Architected an enterprise web app for custom printing design and order tracking. Built a high-precision graphic editor using **JavaScript & Fabric.js** canvas for real-time visual nesting and drag-and-drop asset management. Developed a secure **PHP/MySQL** backend featuring a multi-role user system with 4 distinct dashboards (User, Admin, Manager, Super Admin) to streamline production workflows.

Batch Media File Conversion System

02/2025 – 03/2025

Website

- Developed a multi-format File Converter Tool enabling users to upload multiple images, videos, and audio files & convert them into selected formats in a single action.
- Implemented a batch processing system with real-time conversion handling and optimized performance for simultaneous file processing.

Achievements

- Successfully completed multiple freelance projects with positive client feedback.
- Worked with international clients to deliver custom web applications.
- Improved application performance and fixed critical problems & issues.
- Built long-term relationships through consistent project delivery.
